

Amina Al-Husseini

Chief Information Security Architect & Cryptographer

amina.husseini@cipher-defense.org · (202) 555-0505 · Washington, D.C.

PROFESSIONAL SUMMARY

Enterprise Security Architect with 10 years experience safeguarding critical national infrastructure and fintech platforms. Discovered 3 major CVE vulnerabilities in open-source authentication protocols. Expert in Zero Trust Architecture, Applied Cryptography, Linux Kernel Hardening, SOC2/ISO27001, and Automated Penetration Testing.

CORE TECHNICAL COMPETENCIES

Cybersecurity ? Zero Trust ? Cryptography ? AWS IAM ? SIEM ? Penetration Testing ? Python ? Linux ? OAuth ? JWT ? SOC2 ? Splunk

WORK EXPERIENCE & IMPACT

Chief Security Architect · Vanguard Sovereign Cloud (2020 - Present)

- Architected end-to-end Zero Trust security mesh protecting 14M customer financial accounts across multi-cloud environments.
- Implemented post-quantum cryptographic key exchange and automated mTLS verification across 500+ microservices.
- Led offensive Red Team security audits, identifying and patching 12 zero-day attack vectors before public exploitation.

Principal Security Researcher · Mandiant / Google Cloud Security (2015 - 2020)

- Spearheaded international cyber-espionage threat actor tracking and published 8 declassified threat intelligence reports.
- Authored automated binary decompilation and fuzz testing pipelines in Python and C.

EDUCATION & CREDENTIALS

M.S. in Information Security · Johns Hopkins University (2015) · CISSP · CISM · Offensive Security Certified Professional (OSCP)
