PROFESSIONAL SUMMARY

Senior Backend Engineer with 5+ years of experience engineering high-throughput microservices, event-driven streaming architectures, and

CORE TECHNICAL SKILLS

Languages: Python, Go, SQL, Bash

Backend & Distributed: FastAPI, Django, Gin, Kafka, RabbitMQ, Redis, gRPC, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB

Infrastructure: Docker, Kubernetes, Linux, AWS (EC2, RDS, S3), Git, CI/CD

WORK EXPERIENCE

Senior Backend Engineer | Apex FinTech Solutions (2021 - Present)

- Architected payment processing microservices in Go and Python handling 10,000+ financial transactions per second.
- Implemented event streaming pipelines using Apache Kafka and Redis cluster caching, reducing P99 latency from 180ms to 24ms.
- Designed database partitioning and read-replica strategies in PostgreSQL for multi-terabyte financial ledgers.

Software Engineer | Streamline Media (2019 - 2021)

- Built scalable REST APIs using Python (FastAPI, Asyncio) and PostgreSQL for a digital content platform.
- Integrated automated Docker containerization and continuous integration via GitHub Actions.

EDUCATION

B.Tech in Computer Engineering | University of Washington (2019)
