

## LUCAS DUBOIS

Email: lucas.dubois@computervision.ai | Phone: +1 (555) 321-7654

San Jose, CA | GitHub: github.com/lucas-dubois

## PROFESSIONAL SUMMARY

Computer Vision & Embedded AI Engineer with 4 years of experience training neural networks, deploying edge AI inference models, and op

## TECHNICAL SKILLS

AI & Computer Vision: PyTorch, OpenCV, Deep Learning, CNNs, YOLO, TensorRT, ONNX Runtime

Languages & Systems: Python, C++, CUDA, Linux, Docker, Git, REST APIs, Embedded Systems

## PROFESSIONAL EXPERIENCE

Computer Vision Engineer | VisionX Robotics (2022 - Present)

- Trained custom object detection models (YOLOv8) in PyTorch for autonomous robotic navigation.
- Accelerated neural model inference on NVIDIA Jetson edge devices using TensorRT and ONNX Runtime, achieving 45 FPS real-time pro
- Developed real-time video streaming pipelines using OpenCV and C++ multi-threading.

Deep Learning Engineer | NeuroLens Systems (2020 - 2022)

- Built image segmentation models in PyTorch for medical imaging classification, achieving 96.4% dice score.
- Containerized model serving microservices using Docker and FastAPI.

## EDUCATION

M.Sc in Computer Science (AI & Robotics) | Stanford University (2020)

B.Tech in Computer Science | McGill University (2018)
