CORE TECHNICAL COMPETENCIES

Python ? PyTest ? Cypress ? Selenium ? Docker ? CI/CD ? Postman ? TypeScript ? GitHub Actions ? SQL

WORK EXPERIENCE & IMPACT

Lead SDET Automation Engineer · Equities Edge Trading (2020 - Present)

- Built enterprise test automation framework in Python and PyTest executing 1,200+ integration tests nightly.
- Containerized test runners in Docker on GitHub Actions, cutting regression cycle duration from 4 hours to 22 minutes.
- Implemented contract verification tests and automated load testing via Locust.

QA Automation Engineer · TransAct Global (2018 - 2020)

- Authored end-to-end web test suites using Selenium WebDriver and Java.
- Maintained automated regression test runs and integrated status reporting with Jira.

EDUCATION & CREDENTIALS

B.E. in Information Technology · Mumbai University (2018)
