

Vikram Rao

Lead Cloud Data Platform Engineer & Architect

vikram.rao.data@example.com | +1 (555) 782-9012 | Austin, TX | github.com/vikramrao-data

PROFESSIONAL SUMMARY

Data Platform Architect with 7+ years of expertise designing petabyte-scale data mesh infrastructures, streaming analytics, and automated data quality frameworks across AWS and Google Cloud.

CORE TECHNICAL COMPETENCIES

Apache Spark ? Apache Airflow ? Snowflake ? BigQuery ? dbt ? Kafka ? Python ? SQL ? Terraform ? AWS S3 ? Iceberg ? Docker ? PyTest

EXPERIENCE & IMPACT

Lead Data Platform Engineer · OmniStream Analytics (2021 · Present)

- Architected unified Iceberg lakehouse on AWS S3 processing 18 TB of streaming telemetry daily with Kafka and Spark Streaming.
- Spearheaded dbt transformation mesh across 450 models, reducing daily batch SLA from 4.5 hours to 58 minutes.
- Orchestrated 120+ resilient Airflow DAGs with Great Expectations data contracts, driving pipeline data reliability to 99.9%.

Senior Data Engineer · Kinetix Health (2018 · 2021)

- Engineered HIPAA-compliant BigQuery analytics warehouse consolidating 4 disparate EMR systems.
- Optimized SQL window queries and partitioned clustering schemas, slashing BigQuery cloud compute spend by \$240K annually.
- Automated end-to-end data ingestion pipelines with Python, Docker, and GitHub Actions CI/CD.

EDUCATION & CERTIFICATIONS

M.Tech in Computer Science & Data Engineering, IIT Bombay (2016 · 2018) · B.Tech (2012 · 2016)
